Our faculty have earned numerous prestigious awards, including the Nobel Prize, Pulitzer Prize, Indiana polis Prize for animal conservation, Abel Prize and the inaugural Breakthrough Prize in Mathematics. The University offers students an elite education with an outstanding return on investment: U.S. News; World Report ranks Stony Brook among the top 50 public universities in the nation. Its membership in the Association of American Universities (AAU) places Stony Brook among the top 62 research institutions in North America. Stony Brook University has 68 majors, 81 minors, more than 100 graduate school programs and 40 PHD programs. Most popular undergraduate majors are, for instance, Health Science, Psychology, Biology, Business Management, Applied Mathematics and Statistics, Mathematics, Computer Science, Biochemistry, Economics and Mechanical Engineering. In 2017, Stony Brook established China Center, that will collaborate with partner universities in China in research, faculty collaboration and student mobility and organize short-term training and/or certificate programs with government agencies, business sectors and educational institutions. There are various types of educational centers, libraries, student entertainment centers, and other ancillary equipment in the campus. In addition to advanced teaching facilities, on-campus hotel and student apartments will serve scholars from all over the world.</p>
