February 22, 1983  
Wrocław, Poland

On February 21, and 22, 1983, during the visit of Acting Director of International Programs at SUNY Stony Brook, Roman de la Campa at Wrocław University, the following points concerning the exchange agreement of the two universities were discussed: The fact of Professor de la Campa's visit manifests the interest and desire for the continuation and development of this agreement; in spite of extenuating circumstances / financial, administrative, etc. / effecting both universities, it was determined that both universities will continue the exchange, and that for the academic year 1983/84, each university will accept at least one person from the other university; as concerns the Exchange Agreement Extension signed in April 1980, it was determined that no changes, or additions would be implemented.
